

Melanin Sun lenses

Do you know that Melanin protects your skin every day against the sun? Now, you can also protect your eyes with Melanin lenses.

Essilor Airwear Prescription Melanin lenses and BNL Melanin Plano lenses, inspired by the natural defenses of the human body against the sun, filter both UV rays and blue light, while preserving the color perception.

Starting early to protect children's fragile eyes will have a positive impact on adult vision.

Melanin lenses are equivalent to a sun lotion with a SPF (Sun Protection Factor) superior to 140.
